Target version:			**Spent time:**	5:30 hours

Description

It would be good to implement the following:

- Top navigation menu adjusts for access from keyboard
  - It includes visibility if in focus.
  - Adding separate button for navigation pane activation.
- Add hints to the links and table column titles (that are part of the framework).
- Differentiate navigation to "Home" from navigation to "Back to Document Index".
  - It is required when the framework is hosted out of the domain root address.

Subtasks:

CodeTask # 113: Accessibility improvements	**Closed**
